

PLATFORM SCIENCE WORKFLOW

The Customizable Workflow Experience Your Fleet Deserves

PS Workflow enables drivers to focus on what matters by automating data entry, reducing steps at each stop, and never asking for the same information twice

CREATE A GREAT DRIVER EXPERIENCE

Enhance your drivers' experience and increase efficiency with our automated information capture, data-driven jobs, smart logic, and configurable forms. Drivers save an average of 5 minutes per load, reducing stress and increasing satisfaction.

YOUR WORKFLOW, YOUR WAY

Tailor PS Workflow to fit your fleet's needs. From dispatching loads to capturing data, PS Workflow can be customized to how your fleet operates.

SAVE TIME & ELIMINATE ERRORS

Increase data accuracy and save time with our intelligent geofence capabilities for automating load tasks such as arrivals and departures. PS Workflow pulls load information from your TMS and syncs with PS Form Messages and PS Navigation to pre-populate information.

BUILT-IN TMS INTEGRATION

Automate driver load interactions directly into your TMS through supported integrations with popular systems like McLeod and Trimble.

SEAMLESS APP INTEGRATION

Keep your fleet connected and on time by seamlessly integrating Platform Science and partner apps into your fleet's Workflow for easy navigation and fewer taps.

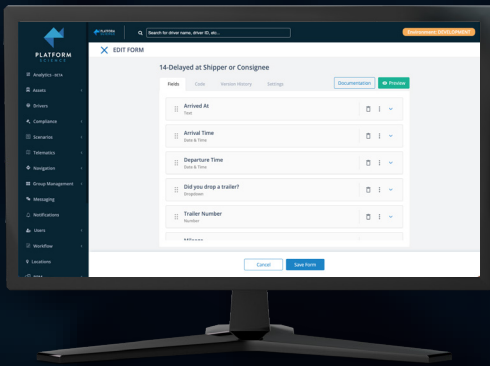

Connect with us to see PS Workflow in action and learn how to automate your fleet's driver experience.

PS WORKFLOW

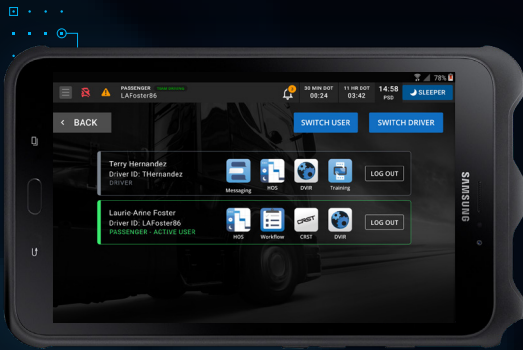

Feature Spotlight

VISUAL FORM BUILDER

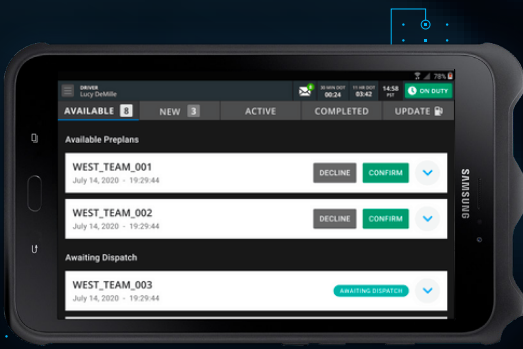

Create a better experience for your drivers with easy form building that increases efficiency and unlocks new features by reducing extra steps and only collecting information your back-office team needs.

TEAM DRIVING SUPPORT

Keep team drivers aligned with their tasks and priorities through multi-user workflows and group chat messaging.

PREPLANS

Increase driver preparedness and satisfaction with Preplans, which gives drivers all the trip information they need before hitting the road for greater efficiency and a better in-cab experience.
