

PLATFORM SCIENCE ASSET TRACKING

Expertly track your assets
with pinpoint accuracy

Streamline Your Operations with Constant Truck Monitoring and Instant Information Access

SEE LOCATIONS OF EVERY TRUCK

Seeing every truck or a group of trucks in one easy-to-read map view allows you to answer customer questions and provide accurate updates on arrivals.

EFFORTLESS SEARCHING AND FILTERING

With easy-to-use filtering and search capabilities, quickly drill down to the asset or groups of assets you are looking for. Spend your time-solving problems, not sorting through data.

ALL INFORMATION IN A SINGLE PANE OF GLASS

Eliminate the time spent jumping between tabs and searching for all the information you seek. Instead, get the details you need with a single click, including driver ID, heading, duty status, and more.

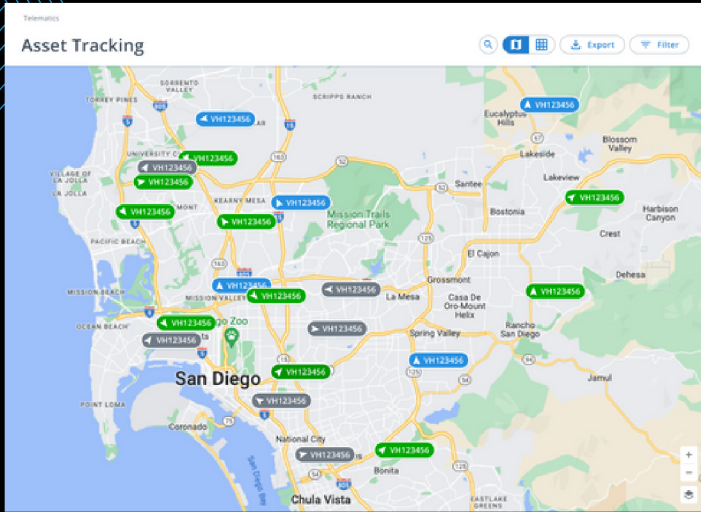

FIND NEAREST TRUCK

Deploy nearby trucks to help with a load or a breakdown by seeing what available drivers are close to that location. Simply right click on a location, select a radius in miles and all trucks in that area will be shown. No more calling around looking for drivers, accurately deploy, and get deliveries back on track.

Connect with us to see PS Asset Tracking in action and learn how we help you monitor your entire fleet in one view.

PS ASSET TRACKING

Feature Spotlight

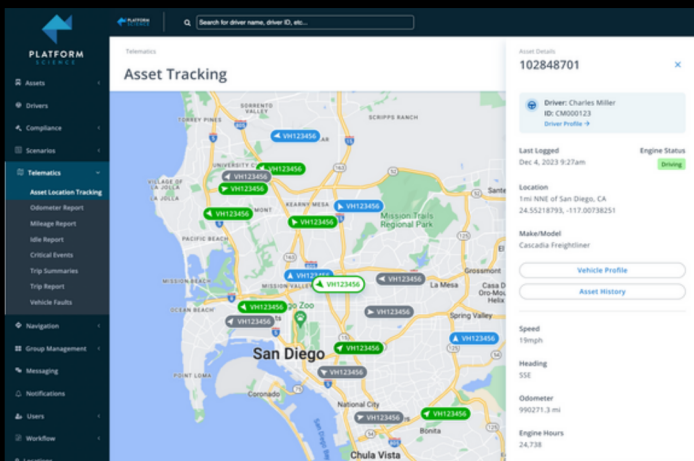

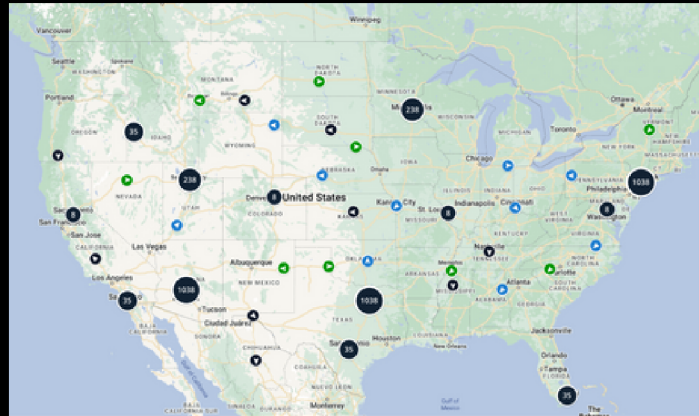

DIRECTIONAL & DUTY STATUS ICONS

Quickly see what direction a driver is heading and their current duty status.

FLEET CLUSTERING

Zoom in on the map with a single click into a grouping of assets to see which trucks are in a specific location.

IN-SCREEN ASSET DETAILS

You can view significant details on the asset and click on associated pages without leaving the map view and without obscuring the map.
